DETAILED ACTION

1. The Examiner has carefully considered Applicants' terminal disclaimer filed on 2/9/2004, and amendments and remarks filed on 3/17/2004. Applicants' terminal disclaimer, amendments to claims 2-9, cancellation of claim 1, and newly added claim 18 have all been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn. In particular, in view of the terminal disclaimer filed on 2/9/2004, the double patenting rejection over U.S. Patent. No. 6447976 is withdrawn. However, it is noted that Applicants still fail to submit a terminal disclaimer for U.S. Patent. No. 6537656, as stated in a prior Response filed 8/25/2003. As such the double patenting rejection over U.S. Patent. No. 6537656 must be maintained as follows.

Claim Rejections - 35 USC § 112

4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, substantially for the reasons set forth in section 5 of Paper No. 111503, together with the following additional observations.

It is noted that newly added independent claim 18 replaces cancelled claim 1.

For claim 1, the Examiner repeats (see Paper No. 111503, page 3) that the phrase “flange sheet” in claim 1 is used by the claim to mean “skin layer”, “cover layer” or “outer layer”, while the accepted meaning of “flange” is “A protruding rim, edge, rib, or collar, as on a wheel or a pipe shaft, used to strengthen an object, hold it in place, or attach it to another object”. It should be noted that the sheet structure of the instantly claimed imaging member bears no resemblance of a wheel or pipe shaft. As such, the Examiner maintains the term “flange” in claim 1 is indefinite because the specification does not clearly redefine the term. It should be noted that where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999).

Similarly, the Examiner (see Paper No. 111503, page 4) maintains the term “caliper” in claim 3 is indefinite.

Response to Amendment

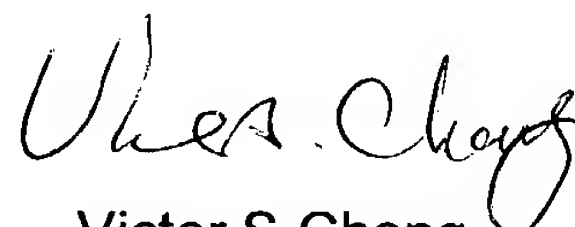

5. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 5, 10, 12, 18, 19 and 21-23 of U.S. Patent No. 6537656 to Dontula et al., substantially for the reasons set forth in section 6 of Paper No. 111503.
